

Reflect on your slide deck

In the previous activity, you created a slide deck to present your dashboard. You may have completed this presentation based on the roleplay exercise you completed earlier in this course, or you may have used another provided scenario. Either way, you got creative and used your presentation skills to construct an effective slide deck. Now, you'll get to share your slide deck with fellow learners and explore their presentations in return.

For this discussion prompt, consider the following:

Describe the design choices you made in your slide deck.

Explain why you created your slide deck this way. What main ideas were you trying to convey? How did your organizing principles, color schemes, visual elements, and other visualization choices support that process?
